

This country has been blessed with free speech and expression. The freedom of the air waves has allowed even the remotest residence of our great country to stay informed with objective points of view and just plain factual information so that all people can make up his or her mind as to what is fact and what is fabrication. The enjoyment of the variety of music without commercial interruption is a dream come true for people that do not need to be sold or brainwashed to think about buying, doing or going where they don't want to or need to go and do. The NAB is way off base here. Don't you folks have better things to do with the tax payers money ????????????????
